📍 Lynnwood, Washington

EXPERIENCE

Student - Full Stack Development

University of Washington Coding Bootcamp

📅 06/2022 - 09/2022 📍 Seattle

- Built full stack CRUD applications, REST APIs, and command line tools in solo and group environments.
- Incorporated front-end frameworks including React, Bootstrap, and Materialize.
- Built SQL and MongoDB databases, interfacing directly, and through Sequelize ORM and Mongoose ODM.
- Gained a strong proficiency with Git and version control after managing repositories for agile team projects.

IT Help Desk Specialist

1st Security Bank of Washington

📅 09/2019 - 06/2022 📍 Mountlake Terrace

- Provided Tier 3 Support to internal customers at all levels of the organization.
- Interviewed and surveyed users to identify pain points, resulting in improved processes and employee experience.
- Facilitated Home Lending's complex technical needs, helping reach \$1,730,000,000 in sales during 2021.
- Wrote document workflows and complex SQL queries in Epicor ERP.
- Implemented PowerShell to automate repetitive actions like AD and Exchange account provisioning. This saved an average of 10 minutes per account created.
- Led Brightmetrics Call Center Analytics implementation. This project resulted in 2 additional hires and a 2 minute average reduction in customer wait time.

4.0 / 4.0

BA, Anthropology

Western Washington University

09/2015 - 06/2019

GPA
3.85 / 4.0

PROJECTS

Lancer

📍 University of Washington Coding Bootcamp

🌐 <https://lancerpm.netlify.app>

Lancer is a project management site for freelance web developers and their clients.

- Full Stack Developer
- Built the Rest API that powers the site, and implemented the data from the API into the front end.
- Assisted stuck teammates, led stand ups, and reviewed all code passed into the development branch.
- Technologies used: React.js, Material UI, Node.js, Express.js, MySQL, Sequelize ORM, and Nodemailer.

Chew On It

📍 University of Washington Coding Bootcamp

🌐 <https://chew-on-it.herokuapp.com>

Chew On It is a social media website built to discover and share reviews of local restaurants.

- Git administrator and backend developer.
- My largest the self referential many to many relationship that underpinned Chew On It's follower system, allowing the site to act as a fully functional social media app.
- Technologies used: Handlebars, Node.js, Express.js, MySQL, Sequelize ORM, and Autocomplete.js.
